Relevant Experience | Projects

Loan Shark | Full Stack Developer | Deployed Link: https://loaning-sharks.herokuapp.com/ | **Github Link:** https://github.com/raseward14/loan_shark
A full stack application, built using the MERN stack to save loans, payments, and track progress towards eliminating debt! The user logs in, to view, and add their loans. Clicking loans displays payments, and allows the user to make payments, instantly updating a progress wheel showing the total percent of debt paid.
- **Role:** Built with React, and styled with ReactStrap on the client side, data is stored with a Mongodb database for models, Express.js and mongoose for controllers, bcrypt package hashes passwords and React tokens for user authentication.
- **Utilized:** React.js, React Hooks, ReactStrap, Javascript, Mongo Atlas, Heroku, Express.js, Node.js

Tech Blog | Full Stack Developer | Deployed Link: https://mighty-taiga-53972.herokuapp.com/login | **Github Link:** https://github.com/raseward14/Tech_Blog
A CMS Style blog site where developers can publish their blog posts and comment on other developers' posts as well. Hosted by Heroku, this application follows the MVC paradigm in its architectural structure.
- **Role:** Utilized Handlebars.js for the templating language, Sequelize as the ORM, and the express-session npm package for authentication.
- **Utilized:** Handlebars.js, MySQL2, Sequelize packages to connect to MySQL database for models, Express.js API for controllers, dotenv package for environment variables, bcrypt package hashes passwords, express-session and connect-session-sequelize packages add authentication.
